Innovative Forsyninger og
Innovative Rådgivere

fra Krüger A/S v. Theis Gadegaard

BlueKolding – Eksempel på udvikling af digital styringsplatform

**“Vi arbejder for en sund, ren og klimasikker kommune
– og en verden, hvor intet går til spilde”**

Fælles historik, bl.a

- Styring af renseanlægsprocesser
- Minimering/styring af afløbssystem (aflastninger og bassinvolumen)

2016

- BlueKolding skal være energiproducerende
- Bidrage til kommunens CO2 strategi og zero waste strategi
- Øget effektivitet (og dele ud af de erfaringer)

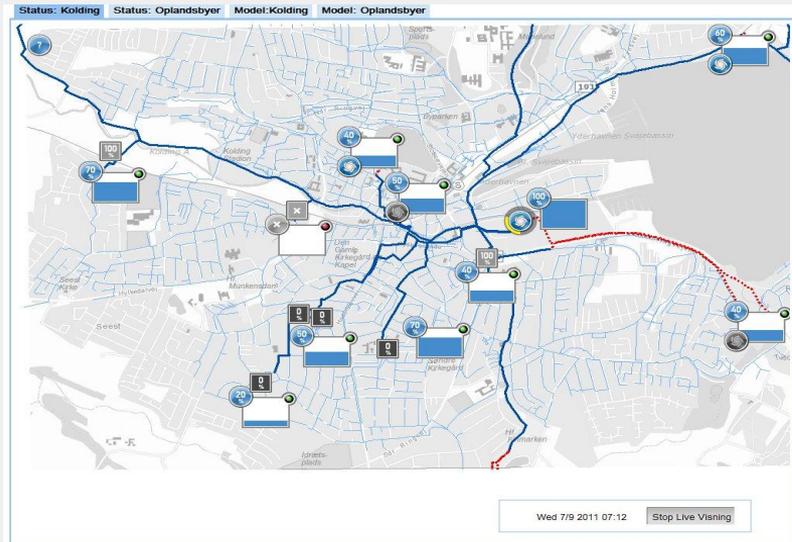

Fakta om BlueKolding

- Vi ejer og vedligeholder de 2000 km kloakrør under Kolding Kommune
- Vi ejer og driver de 5 renseanlæg og 3 forrenseanlæg, der er i kommunen
- Vi sørger for, at regn- og spildevand bliver ledt væk fra huse og virksomheder
- Vi renser dit spildevand og sender det tilbage til naturen
- Vi klimasikrer Kolding ved at etablere anlæg, der skal minimere oversvømmelser fra kloakkerne
- Vi styrer og overvåger spildevandsanlæggene døgnet rundt
- Vi renoverer, udbygger og moderniserer kloaksystemet, så det kan følge med de stadigt stigende regnmængder
- Vi er et selvstændigt aktieselskab 100 % ejet af Kolding Kommune
- Vi betjener ca. 90.000 kunder i 33.000 husstande i Kolding Kommune
- Vi er ca. 50 engagerede medarbejdere

BlueKolding

- Håndtering af slam og andre lignende fraktioner
- Optimere energiproduktion og intern ressourcegenvinding
- Avanceret styring af afløbssystem og renseanlæg
 - Forecast og balanceret flow til Agtrup Renseanlæg
 - SmartGrid

Varme i bænk på busterminal og 200 ungdomsboliger

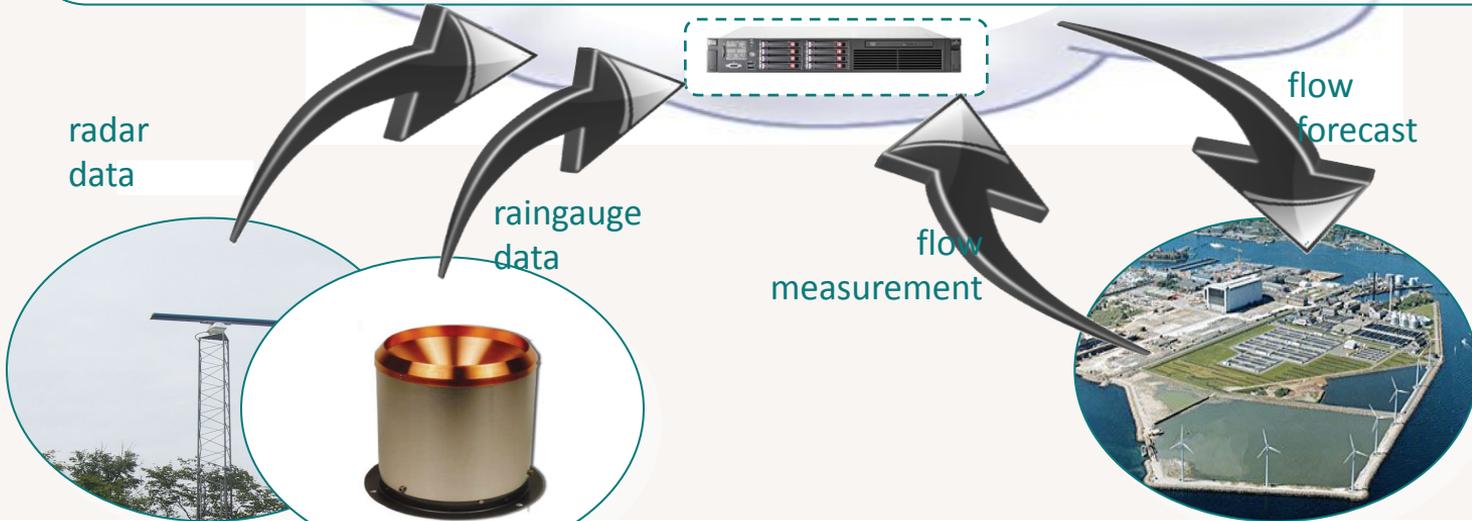

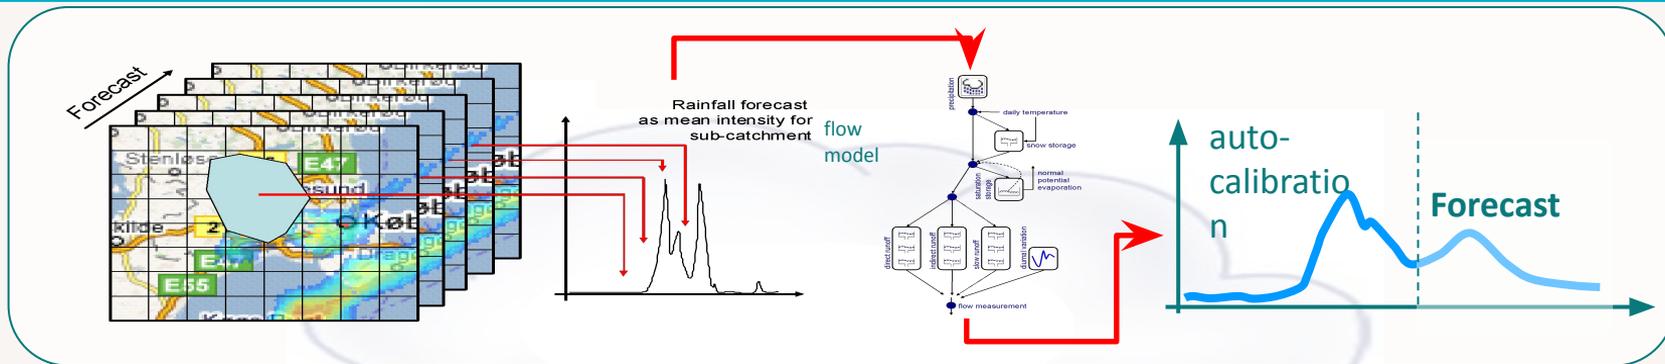

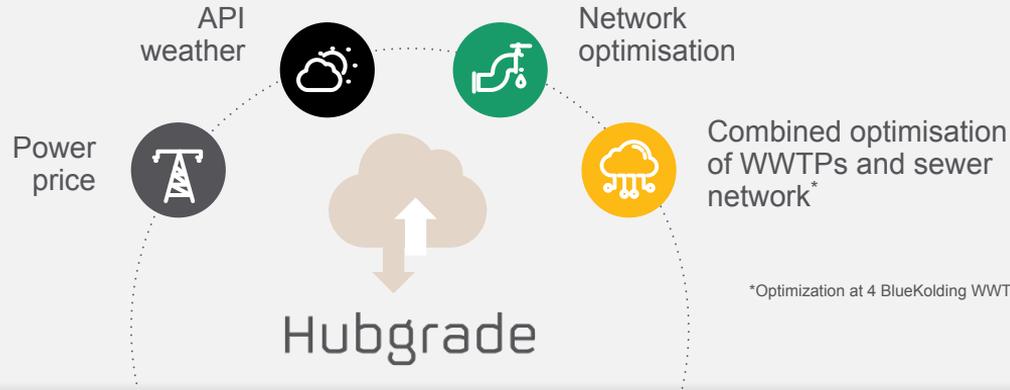

Turbine på udløb fra Agtrup Renseanlæg

3-i-én tank til slam på Agtrup RA

Flow forecast based on weather and rain data

*Optimization at 4 BlueKolding WWTPs, in connection with Sewer

Drivers

- Reduces Capex and Opex !
- + Increased **hydraulic & biological capacity**

Benefits

- ▶ Increased **capacity of sewer**
- ▶ **Compliance** and stable operation
- ▶ **Improved operation**, staff advantages, data handling and reporting

Reduced:

- Nitrogen - 27%
- Chemical - 46%
- Energy consumption - 23%

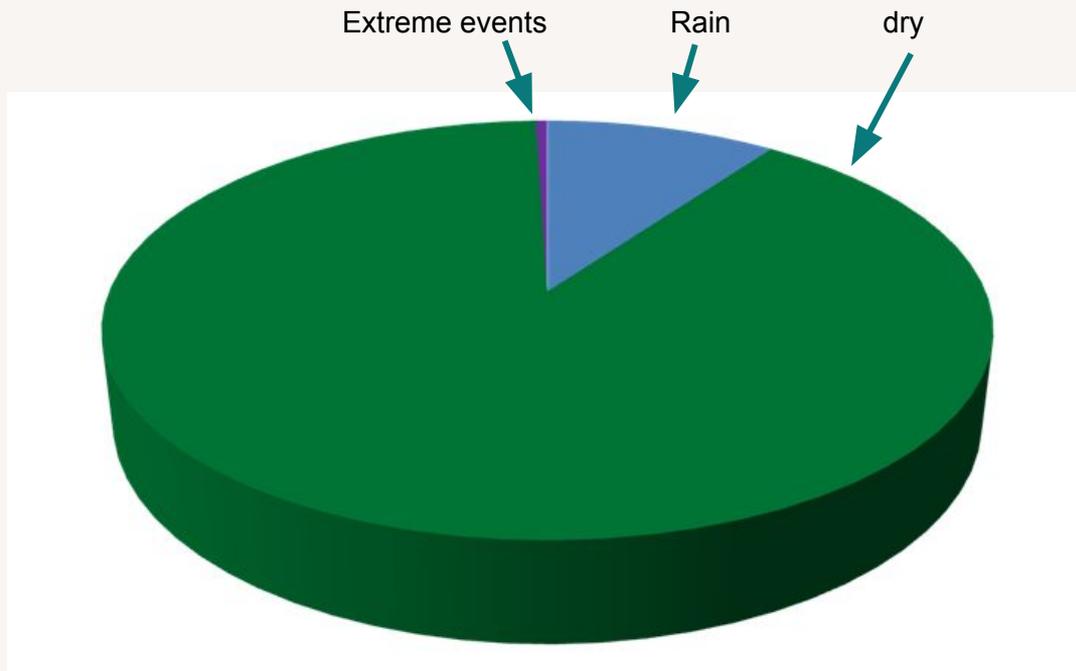

- Hydraulic capacity + 80%
- Overflow - 83%

BlueKolding

- **Avanceret styring af afløbssystem og renseanlæg**
 - **Forecast og balanceret flow til Agtrup Renseanlæg**
 - **SmartGrid**
- **BlueKolding/Krüger - Vant til iterativt samarbejde om styring**
- **Tørvejrs forecast ?**
 - **Energioptimering...?**
- **EUDP projekterne SmartGrid og BlueGrid**

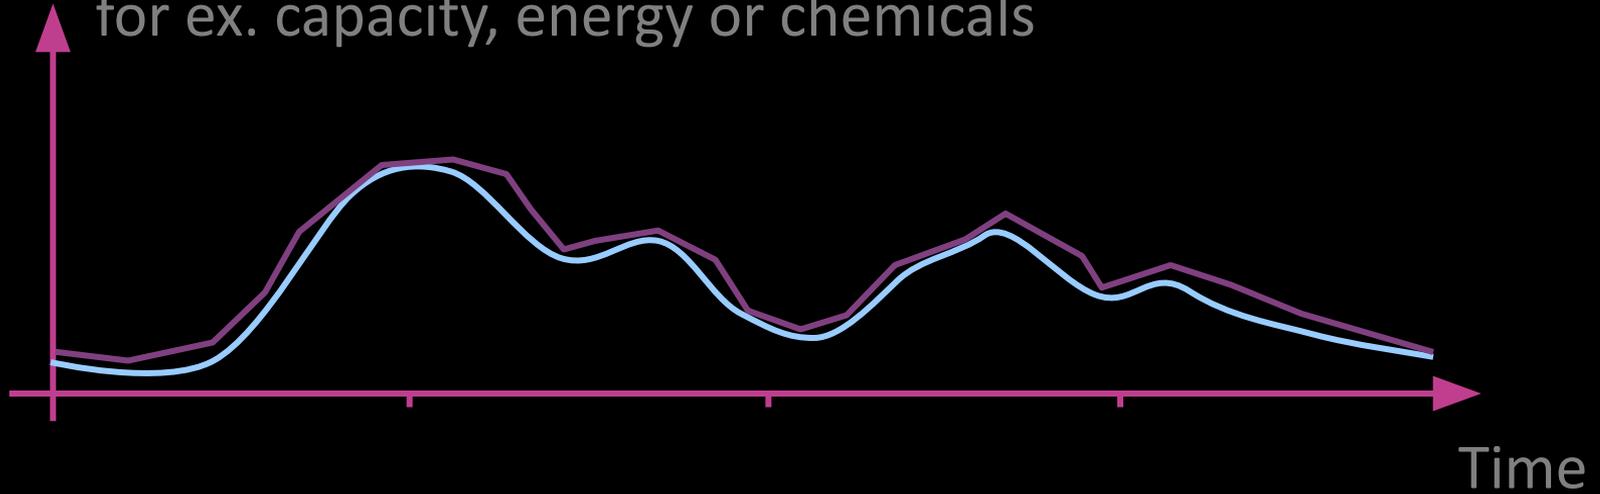

SMARTGrid

Fleksibel anvendelse af afløbssystem og renselanlæg

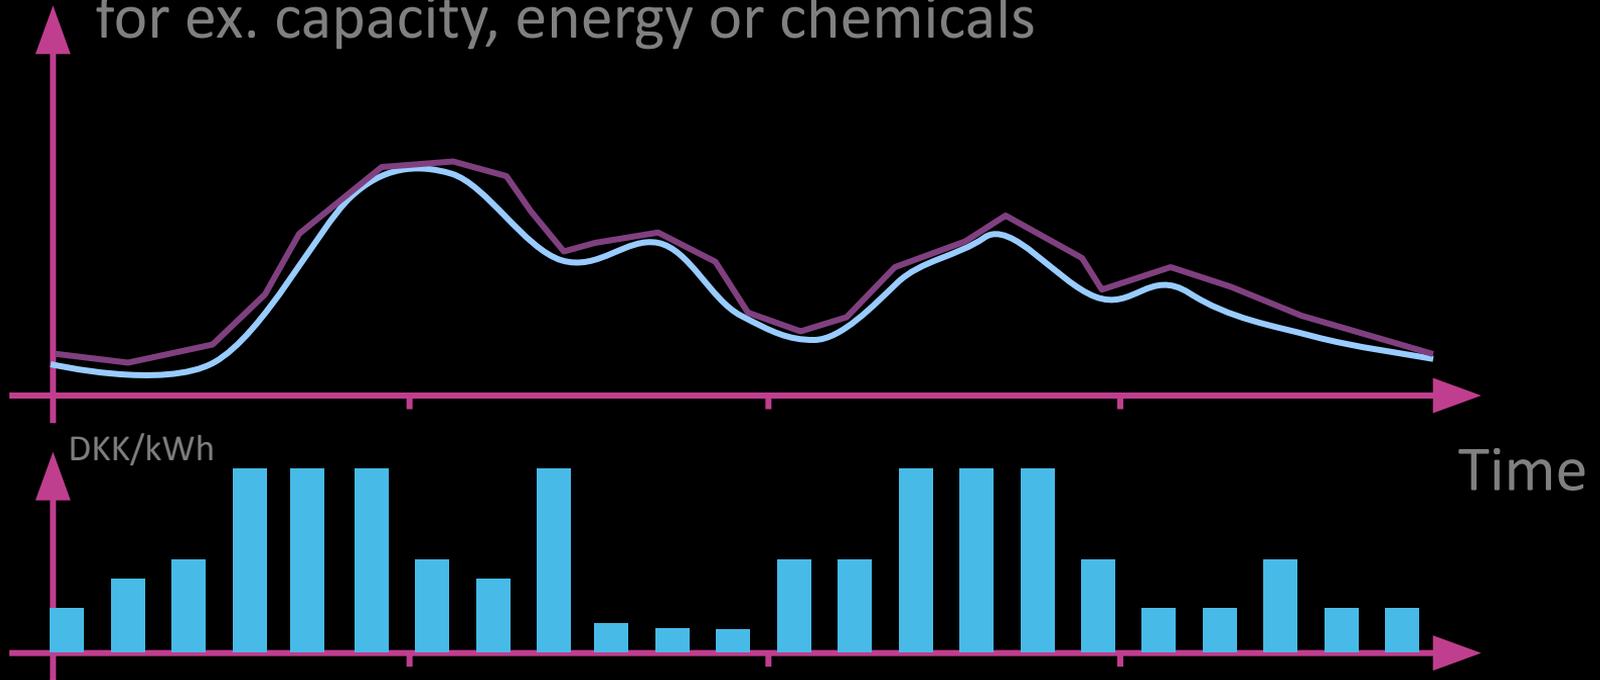

With HUBGRADE

for ex. capacity, energy or chemicals

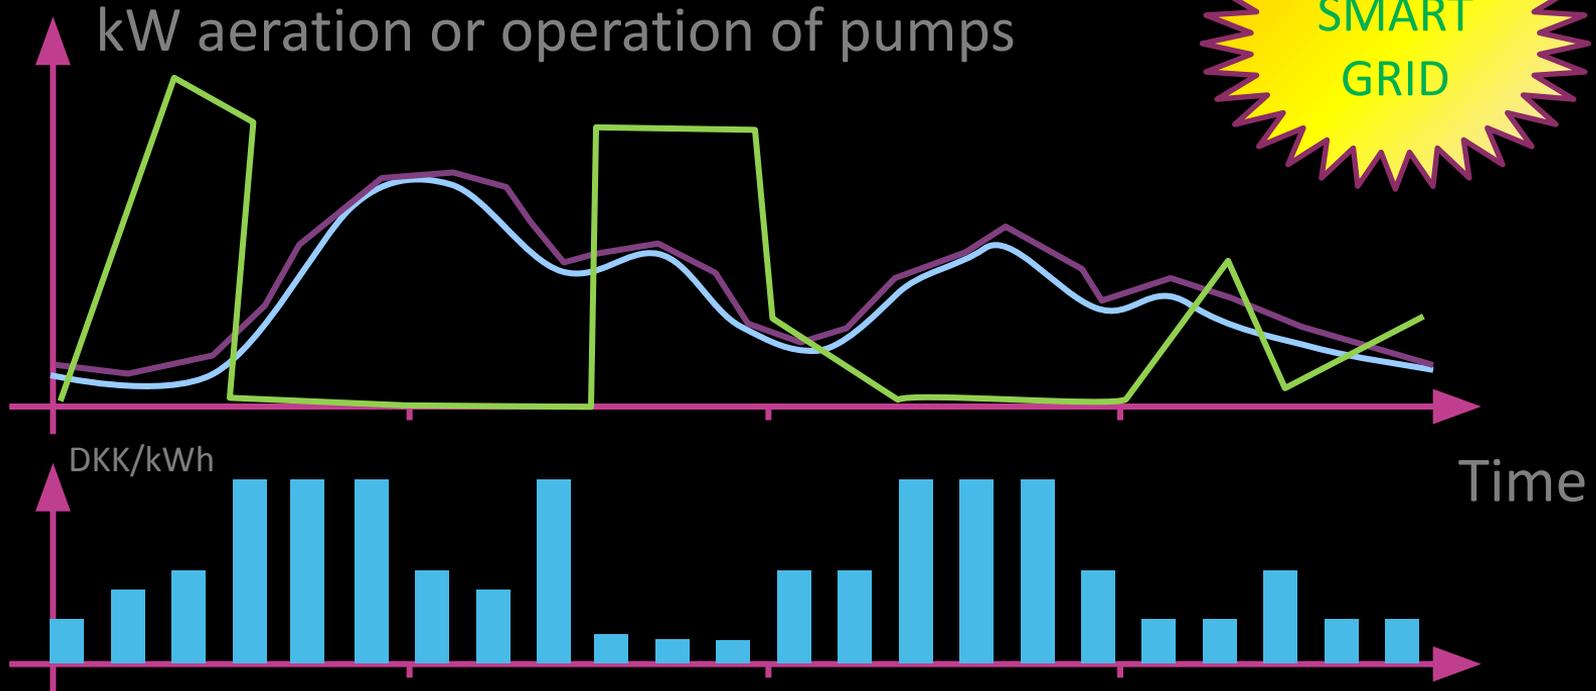

With HUBGRADE

for ex. capacity, energy or chemicals

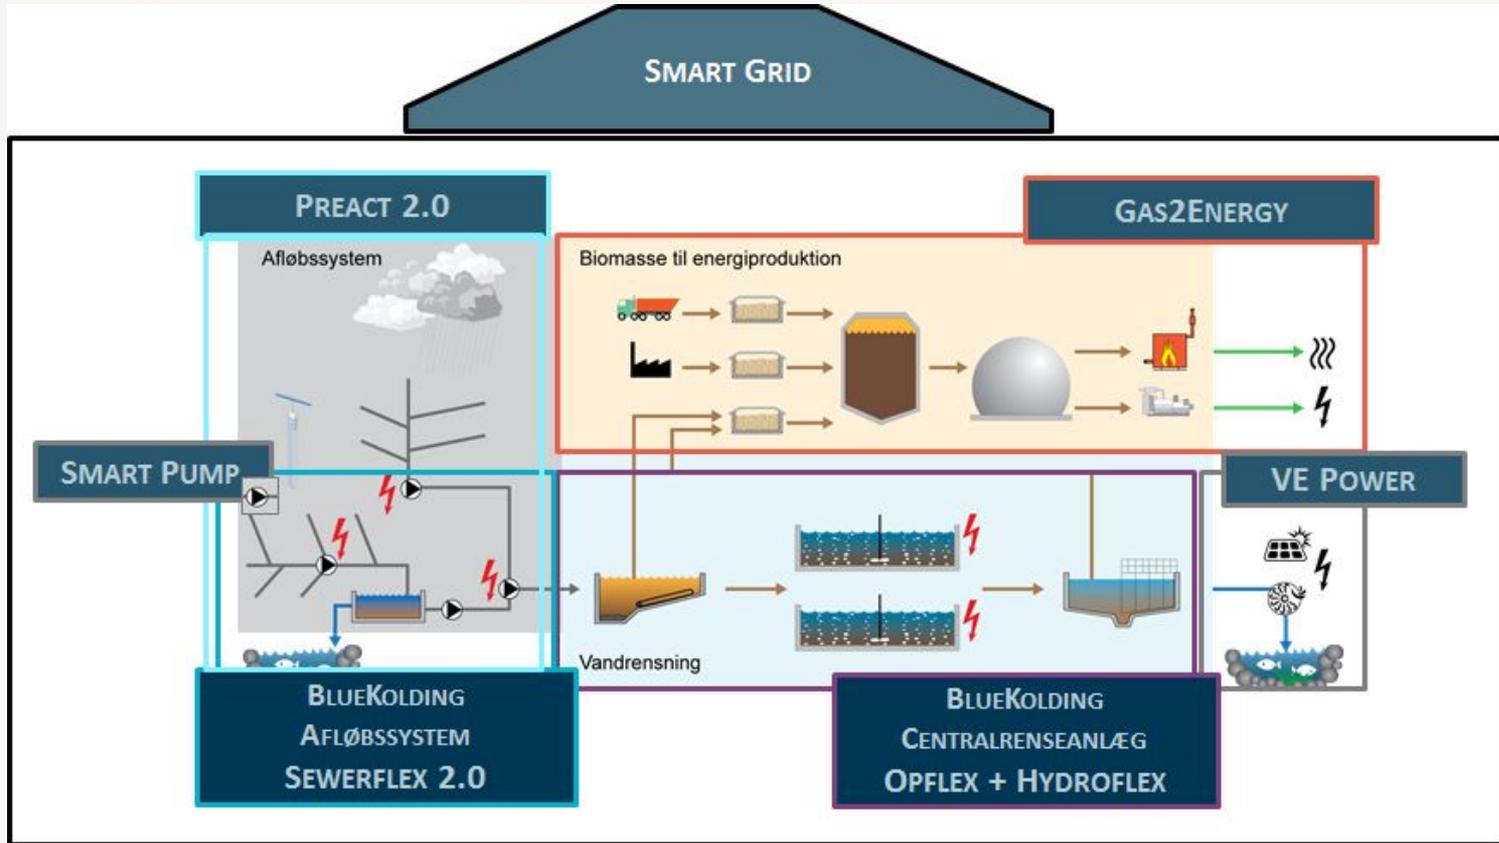

With HUBGRADE

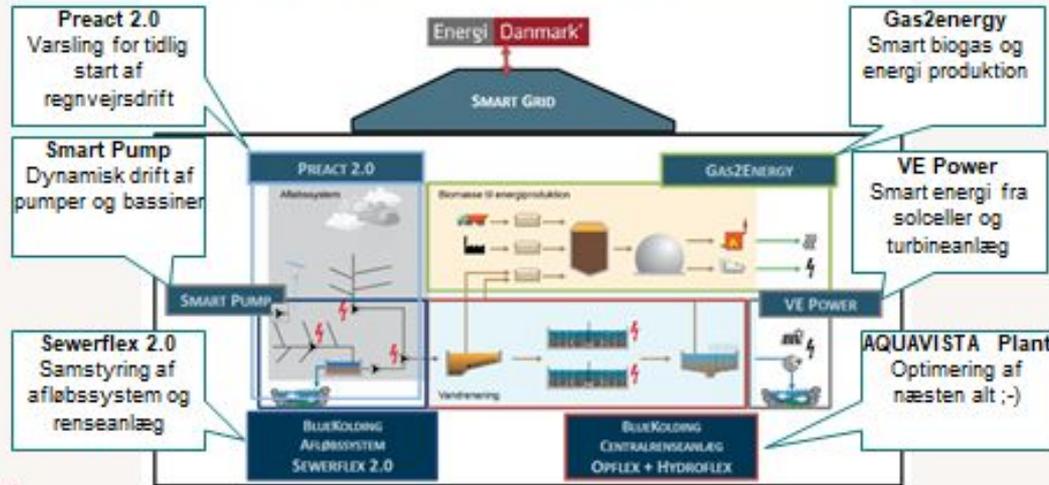

BlueGrid

Flexible energy utilization for full system integration

BlueKolding

Intelligent styring i BlueKolding

Proces - optimering

Slam og gas - optimering

El fra turbine og sol - etablering

Styringsplatformen HUBGRADE

Demand/Response (time)

- Brugere/Producere energi

Udveksling med Energi Danmark

- N i udløb, - 27%
- Energiforbrug, - 23%
- Kemi, - 46%
- Hydraulisk kapacitet, + 80%
- CSO, - 83%
- SmartGrid + BlueGrid (1-400.000/år)

CO2-status 1990 - nu + Værktøj

NB: Lattergas

Spørgsmål

???

We ensure health and wellbeing through clean water, effective climate solutions and sustainable food production

Other SDG's	<p>2 ZERO HUNGER</p>  <p>We enable sustainable production of food</p>	<p>6 CLEAN WATER AND SANITATION</p>  <p>We enable a sustainable water cycle</p>			<p>13 CLIMATE ACTION</p>  <p>We enable effective climate solutions</p>	Other SDG's
<p>7 AFFORDABLE AND CLEAN ENERGY</p> 	Landbased aquaculture	Protection of groundwater	Safe and healthy drinking water	No hazardous substances in our recipients	Reduce energy consumption & enhance green energy (smartgrid)	<p>12 RESPONSIBLE CONSUMPTION AND PRODUCTION</p> 
<p>9 INDUSTRY, INNOVATION AND INFRASTRUCTURE</p> 	Fertilizer from wastewater	Optimised use of all water resources	Optimization of resources used	Recovery of resources from wastewater	Reduce greenhouse gas emission and carbon footprint	<p>14 LIFE BELOW WATER</p> 
<p>11 SUSTAINABLE CITIES AND COMMUNITIES</p> 	Reuse of treated wastewater/Drinking water with "food quality"	No risk to human or environment from pollution	Robust, stable and safe supply of water	Healthy and safe working conditions	Minimise consequences of heavy rain	<p>17 PARTNERSHIPS FOR THE GOALS</p> 

Engaged and committed employees

Operational excellence

Best available technologies

Resourcing the World 
 to the benefit of Planet, Clients, Shareholders, Employees and Society

1. Environmental Performance

Reduction of environmental impacts

WWTP - Greenhouse reduction/ N2O reduction

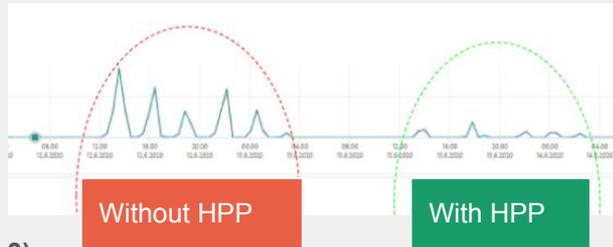

MFP: Combating Climate change

1) Installing of a N₂O online sensor in the biological process tank

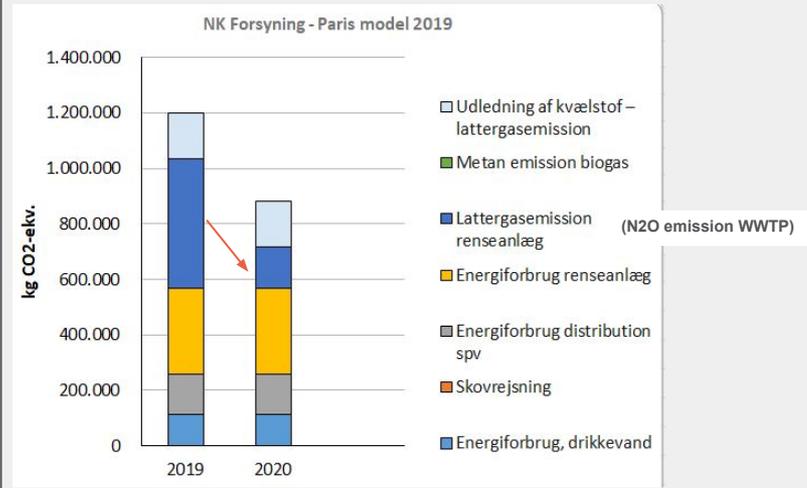

2) Real-time controlling and optimizing by Hubgrade Perf. Plant (figure shows test on Næstved WWTP)

3) Calculating the N₂O-emission and the reduction of CO₂e

Carbon footprint of NK-Forsyning before N₂O-controlling (2019) and after N₂O-controlling (2020)
